

Food Manager Training

The San Antonio Metropolitan Health District requires that each business that serves open potentially hazardous foods and drinks is required to have one certified food manager on duty at all times during hours of operation. To meet this standard a supervisory person must:

- Take and pass a Texas Department of Health approved Food Manager Training Course
- Receive the Texas Department of Health ID card.
- Bring that card to the San Antonio Metro Health District, at 332 W. Commerce and obtain your SAMHD ID Card.

This is a list of approved courses in the San Antonio Metro area:
